

WILSON ANGELIE TAN

+628116150122 | wilsonangelietann@gmail.com | <https://wilsonnntan.vercel.app>

Hi, I'm Wilson Angelie Tan, a Computer Science student at Padjadjaran University focused on software engineering. I enjoy building software and exploring system design, security, and maintainable architecture, while actively contributing to open-source projects to grow through real-world collaboration.

Work Experiences

Piowsee - Sumedang, Indonesia

Jan 2025 - Present

Co-Founder, Lead Engineer

website: piowsee.com, pesan-ai.vercel.app

- Built a web application using Next.js and shadcn/ui that leverages AI to generate, enhance, and manage CVs, improving accessibility and overall user experience.
- Developing a web platform integrated with the WhatsApp Cloud API to transform WhatsApp into an AI-powered bot with automated agent workflows (n8n), alongside a full-featured WhatsApp Web CRM dashboard.

Center for Teaching and Learning Innovation - Sumedang, Indonesia

Mar 2026 - Jun 2026

Full Stack & AI Engineer Intern

- Developed a full-stack Next.js web app with an integrated AI model to classify chemical solution concentrations from uploaded images.
- Managed end-to-end delivery including AI model development, web integration, and deployment configuration.

Simpliview - Ontario, Canada (Remote)

Jan 2026 - Mar 2026

Full Stack & Gen AI Engineer Intern

- Improved data-driven insights by 65% through Gemini Conversational Analytics and prompt engineering to allow users to interact with uploaded datasets via a natural language interface.
- Architected and built secure public API endpoints by integrating JWT and API Key authentication for external access.
- Orchestrated 3 agent ecosystem using LangChain and Vertex AI to automate Python scripting and BigQuery analysis with global user-intent memory.

Organic Steel - Rezekne, Latvia (Remote)

Oct 2025 - Dec 2025

Software Engineer Intern

- Maintained and operated 3+ production websites, ensuring 90%+ availability through routine updates and proactive bug fixes.
- Developed 2 web applications using Next.js, implementing authentication and third-party API integrations.
- Implemented GitLab CI/CD pipelines to automate build and deployment processes, reducing manual deploy time by ~80% and increasing deployment consistency.

Education

Universitas Padjadjaran - Bandung, Indonesia

Bachelor of Computer Science, 3.85/4.00

- work with a team of 6 engineers to design and deploy a collaborative web application, implementing GitHub Action and structured Git workflows (branching strategy, pull requests, code reviews) to ensure scalable development and version control integrity.
- Directed a team of 3 developers in building an object-oriented Tetris game from scratch as part of OOP coursework.
- Strengthened leadership and technical execution skills by coordinating sprint planning, task delegation, and integration testing, improving team delivery efficiency and reducing merge conflicts through disciplined GitHub repository management.

AWS re/Start Graduate - Remote

Certificate in AWS re/Start Program

- Gained hands-on experience in deploying, managing, and securing cloud resources using core AWS services (EC2, S3, Lambda, IAM, VPC, etc.).
- Learned Linux fundamentals, networking, security, and scripting with Python for automation and cloud operations.

Open Source Project Contribution

better-auth

- Present

Contributor

The most comprehensive authentication framework

- Contributed bug fixes, API improvements, and documentation to improve developer experience.
